

WinEst

From Conceptual to Detailed Estimating

With a proven record of empowering estimators involved in any phase of the estimating process- initial conceptual budgeting through specialty execution- Trimble WinEst serves the quantity takeoff and cost estimating needs of building construction clients both large and small.

Easy-to-use Excel-like Interface

With a robust database hidden behind an easy-to-use Excel-like interface, estimators feel right at home performing quantity takeoffs, examining work at any point in time, creating what-if scenarios, and summarizing costs to user-defined groupings.

Fewer Errors

WinEst captures your most experienced estimator's methods and creates a database of repeatable best practices, leading to estimates that are more accurate and reducing the opportunity for error.

Adaptable “Intelligent Database” Technology

Developed from the estimating professional's perspective, WinEst is flexible enough to help you retain your rules and develop items and assemblies that mirror your existing estimating practices, as opposed to changing your methods because the software requires it.

Powerful sorting & grouping

WinEst provides an estimate spreadsheet environment that allows you to setup an unlimited number of views, as well as customized groupings and sorting, so that you can view estimates in the way that is most meaningful to your company.

Easy Collaboration

WinEst makes it easy to share project information and collaborate with the people that matter, allowing multiple estimators to work on the same estimate at the same time, even if those estimators are located in different offices around the country.

Benefits:

- **Bid confidently and win more work:** Convert your unique historical cost data into valuable early-stage estimates.
- **Produce consistent estimating outcomes:** Standardize and organize your estimating processes to ensure that everyone is on the same page and can deliver accurate and consistent estimates.
- **Streamline workflows:** Save time and avoid errors using the WinEst integration with the Trimble® Connect® solution, which allows you to share and collaborate on project information with the right people at the right time.
- **Save time for things that matter:** WinEst will reduce the complexity of delivering accurate estimates throughout the entire construction process. No need to learn and use multiple tools!

Supported Systems

- Windows Server 2022
 - Windows Server 2019
 - Windows Server 2016
 - Windows Server 2012 R2
 - Windows Server 2012
 - Windows 11
 - Windows 10
- (Note: WinEst installed on a Mac system (Windows installed or virtualized) is NOT supported)
